(54)INK JET RECORDING SHEET

(57)Abstract:

PURPOSE: To provide an ink jet recording sheet imparting high image absorbability and sharpness and forming an image excellent in light fastness and water resistance.

CONSTITUTION: An ink receiving layer is provided on a support composed of a nonwoven fabric and the components thereof mainly consist of ultrafine particles of

specific inorganic pigment and an ultraviolet absorbable cationized polymer and the fragile air permeability prescribed by JIS L1096 of the ink jet recording sheet after the ink receiving layer is applied is 100cc/cm²/sec or less. Pref., a structural unit having ultraviolet absorbing capacity is a 2-hydroxybenzophenone residue or a 2-hydroxybenzotriazole residue.
